This tutorial shows how to start a seminar recording.

Start the projector through the iPad by opening the iRule application.
Select the Projector (Laptop) as the input source and then press the green On button.
Add batteries to the microphone and switch it on.
In case the camera is switched off, turn it on by pressing and holding the Power button (1) and then the 1 button (2)

On the recording computer, start the Boinx TV application through the doc.
Choose the MHIT template.
Use the joystick to aim the camera.

Use the wheel on top of the joystick to zoom the camera.
Select the Lower Third layer and then open the content tab.

Add the speaker name in "Title" and "HIT Lab NZ, DATE" in the "Subtitle".
Start the recording by pressing the record button.

Start the transition from the starting logo to the cameras by either pressing the "q" key or by pressing the "Live" button of the Intro layer.
Activate the Lower Third layer to display the speaker details by either pressing the "w" key or by pressing the "Live" button of the Lower Third layer.

You can change the source for the background by pressing:
1. black
2. HIT Lab Logo
3. Camera
4. Projector

You can change the source for the Picture in Picture by pressing:
8. Camera
9. Projector

Press the record button again to stop the recording.
Switch off the projector through the iPad and do also switch off the microphone.
